Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

If you should support this bill I believe that you would also support other increases in taxes to burden the already overtaxed individuals who have to work to support themselves from day to day.

My family may use a total of 30 minutes of cellular phone time each month and, possibly 1 hour of landline communication each month at the most, and that is only for family communication(Elderly parents,Sick relatives).

I'm already taxed on all that I purchase and what I own so, what's next, AIR!

I don't know if I can afford THIS!

Please give consideration to those less fortunate than yourselves.

Sincerely,

Tom Kimbley
